FW: DRAFT Call Notes - Tower Standard Technical Group

Bob,

John told me that he has a number of concerns about how things are going with the work at Tower. He was concerned that the schedule was slipping and the tribe was not being transparent. He indicated that his management was comfortable directing REI to continue its work as stated under the DNR regulations Part 700. That would mean that they might go ahead without coordination steps with the tribe.

Meanwhile, John also told me that the Kozak's were concerned with the amount of time things were taking. They also do not believe that the tribe is providing them appropriate notice whenever activities are taking place on their property.

John told me that the senior management rescheduling effort fell off because the tribe was not providing dates that would work for the meeting. I told Mike this as this is something that he may want to discuss with Larry.

Can you send me notes from these technical meeting calls when they happen? Maybe you didn't send this one because it is still in draft form.

Sherry

Sherry

Per our conversation earlier this afternoon I am forwarding to you recent correspondence between Chris Saari and Kristen Hansen relating to the technical meeting minutes. Chris had expressed concern that some of the comments were not discussed at the meeting

We are committed to service excellence.
